-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The IDS received 4/19/2005, the preliminary amendment received 4/19/2005 have been entered.

Election

Applicant's election of Group II, claim 2 and the species cardiovascular disease in the reply filed on 7/12/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Please note that the election of species of cardiovascular disease is dropped but the restriction requirement is still maintained.

The restriction is therefore made FINAL.

Claims 1, 3-26 are nonelected and thus are withdrawn from further consideration.

Only claim 2 is presented for examination on the merits.

Specification

1. The abstract of the disclosure is objected to because the abstract must be a single paragraph. Correction is required. See MPEP § 608.01(b). A new abstract on a separate page is required to replace the current abstract, which is the first page of the WO document of the application.

2. The use of the trademark "Syber Green" on page 19, "Cremophor EM" on page 73, "ABI Primer Express" "AmpliTaq Gold" on page 90 have been noted in this application. They should be

Art Unit: 1655

capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Fujishige et al. (JBC 1999;274:18438-18445).

Fujishige et al. teach a method of determining the activity of a PDE10A polypeptide at a certain concentration and at a different concentration of several test compounds (page 18443, right column, last paragraph and Table II). Table II shows the IC50 value of the tested compounds/inhibitors. To obtain IC50 value (According to the definition of IC50-see attached sheet from Wikipedia webpage), a test compound (inhibitor) needs to be tested at several different concentrations in order to obtain an accurate IC50 value. Therefore, the cited reference is deemed to anticipate the instant claims above.
